

10kg Aluminium MIG reels

Introduction

This New Product Update is a brief introduction to a new product that has been introduced into the Metallisation product range. Please contact your sales co-ordinator for more details.

Background

Historically, Aluminium has been available on 6 to 7kg MIG reels. Whilst being light and easy to handle, the spraying time is limited. Metallisation have introduced a new style of MIG reel that has the same outer and spigot dimensions as a standard MIG reel but a smaller core diameter, enabling 10kg of Aluminium to be supplied. This increases the time required between reel changes and fits onto any standard MIG dispenser.

It is expected that over the coming months, the 10kg reels will become the standard product. Check for stock and availability with your Metallisation sales co-ordinator.

1050/1350 and 1100 grade wire is available on 10kg reels.

Part numbers

1050/1350 grade Aluminium (our standard product)

Part Number	Description
50134MIG(10)	1.6mm 01E Aluminium (10kg MIG)
50144MIG(10)	2.0mm 01E Aluminium (10kg MIG)
50164MIG(10)	2.3mm 01E Aluminium (10kg MIG)
50154MIG(10)	2.5mm 01E Aluminium (10kg MIG)
50184MIG(10)	1/8" (3.17mm) 01E Aluminium (10kg MIG)

1100 grade Aluminium (increasingly specified for CUI applications)

Part Number	Description
50134MIG(10)-11	1.6mm 01E Aluminium (10kg MIG) – 1100 grade
50144MIG(10)-11	2.0mm 01E Aluminium (10kg MIG) – 1100 grade
50164MIG(10)-11	2.3mm 01E Aluminium (10kg MIG) – 1100 grade
50154MIG(10)-11	2.5mm 01E Aluminium (10kg MIG) – 1100 grade
50184MIG(10)-11	1/8" (3.17mm) 01E Aluminium (10kg MIG) – 1100 grade
