## MARK 40 PISTOL

### ★ ON SITE

Designed to operate under arduous conditions, e.g. Spraying Zinc on Ships Hulls, Aluminium on Steel Chimneys.

### ★ IN THE FACTORY

Built to give maximum life with minimum maintenance, e.g. Spraying Zinc on Switchgear, Aluminium on Silencers, and Copper for Electrical Contacts.

### ★ FOR BUILDING UP

Governed deposition to fine limits, e.g. Spraying Steel on Crankshafts, Bronze on Propellor Shafts, Molybdenum on Impeller Blades and Stainless Steel on Textile Rollers.

### ★ OR SPECIAL COATINGS

Ceramics and hard facing materials deposited with equal facility, e.g. Spraying Ceramics by the ROKIDE Process. Spraying Stellite on Pump Shafts. Spraying Stellite on Forming Rollers
