

Powder Data Sheet

Metallisation Part Number

99205/32

Material Description

P205 Grey Alumina 96%
Particle size -45 +15 µm

Related Specifications

None

Composition & Characteristics

Metallisation specification of chemical composition & characteristics* (where applicable)

Composition			Particle Analysis
Element	Min %	Max %	
Al ₂ O ₃	Balance		Particle size range to conform with the technical supply conditions listed in BS EN ISO 14232-1:2017 (Table 1) or International equivalent
CaO		0.50	
Fe ₂ O ₃		0.50	
MgO		0.50	
Na ₂ O		0.10	
SiO ₂		1.50	
TiO ₂	2.50	4.50	
Others-Total		1.00	

Characteristics

Manufacturing-Method Fused & crushed

Packaging Form

Supplied in re-sealable 5KG containers other size containers may be available upon request at time of placing order

Further Information

For further information contact Metallisation for a Technical Bulletin & Application data.
