

Powder Data Sheet

Metallisation Part Number

99636/16

Material Description

P636 Nickel Aluminium

Particle size -90 +45 µm

Related Specifications

BS EN ISO 14232-1:2017

Composition & Characteristics

Metallisation specification of chemical composition & characteristics* (where applicable)

Element	Composition	
	Min %	Max %
Al	4.00	5.50
Ni	93.00	
Organic-Binder		2.50
Others-Total		1.00

Particle Analysis

Particle size range to conform with
the technical supply conditions
listed in BS EN ISO 14232-1:2017
(Table 1) or International
equivalent

Characteristics

Manufacturing-Method

Mechanically Clad

Packaging Form

Supplied in re-sealable 5.67KG containers other size containers may be available upon request at time of placing order

Further Information
